Name

FOKALDRY
Cleaning solution for the cavity, the root canal, and the tooth surface.
For dental use only

Composition

Acetone, isopropyl alcohol, petroleum ether, and diisopropylether

Indications

Cleaning, degreasing and drying of cavities, tooth stumps, root canals, crowns bridges and brackets.

Notice

When inhaling larger quantities, headache, nausea, and sensation of dizziness may occur.

Mode of application

A cotton wool pellet of appropriate size is soaked with FOKALDRY and used to clean the cavity resp. the stump. Crowns, bridges and brackets should be cleaned with FOKALDRY prior their permanent fixation. Moisten the root canal with FOKALDRY, and dry it with paper points. After evaporation FOKALDRY does not leave a smear film.
Take care that the liquid does not come over the apex into the periapical tissue, while cleaning the root canal.

Further notices

FOKALDRY serves to remove fat-containing remainders of tooth preparations and humidity to achieve a better adaption resp. compound with the rebasing resp. filling material and anchorage cements.
Shelf life

FOKALDRY shall not be used after the expiry date.

Storage and preservation

Immediately close the bottle after use and protect from light. FOKALDRY is an easily inflammable liquid, therefore, do not handle or store it near ignition sources. In the case of larger quantities of evaporated liquid, ensure sufficient aeration.

Administrative form and package size

80 ml solution
500 ml solution (480-ml reserve bottle and 20-ml application bottle)

Date of revision

December 2010
